Prepared by: California Department of Public Health, Injury and Violence Prevention Branch
Report generated from <http://epicenter.cdph.ca.gov> on: June 15, 2021

Rates are calculated per 100,000 population.

* Rates are not displayed if they are based on fewer than 20 cases because they are not reliable.

** Rates cannot be calculated because population data are not available for this category.

Cautions:

- Due to changes in how race and ethnicity were grouped after 2000 in the population data, use caution when comparing race/ethnicity rates before and after 2000.
- Population data were updated in November 2012 to reflect more accurate estimates using 2010 Census Data. Use caution when comparing rates generated prior to November 2012 with rates generated after that date.

See Help for more details about Population Data.

- 2015 Non-Fatal Hospitalization and ED data are not comparable to data from prior years. For 2015, EpiCenter has mapped fourth quarter ICD-10-DM coded data to ICD-9-CM injury categories.
- Injury data are coded to the ICD-9 classification system, except for deaths after 1998, which are coded to the ICD-10. To avoid making invalid comparisons, see

[Help with ICD-9 and ICD-10 codes.](#)
